The Millennial Economy
National Public Opinion Survey
September 2016
Methodology

• On behalf of EY and the Economic Innovation Group, Public Opinion Strategies (R) and GBA Strategies (D) conducted a survey of 1,200 18-34 year olds nationwide.

• Eight hundred and forty respondents were contacted online and 360 were contacted via cell phone. The survey was conducted June 15-20, 2016, and has a margin of error of + 2.83%.
Millennials in 2016

• Concerned about the economy they inherited
• Deeply conflicted about the cost-benefit of college education
• Face high levels of student and other long-term debt
• Distrustful of traditional institutions
• Willing to work hard but are pursuing a risk averse career path
• Believe entrepreneurship is essential to the national economy … but out of reach personally
Millennials are:
Highly educated but struggling with low wages and student debt
State of the Millennial economy

- Two-thirds of Millennials have at least one source of long-term debt outstanding—student loans, home mortgages or car payments—and 30 percent have more than one. Among college-educated Millennials, a staggering 81 percent have at least one source of long-term debt. [WSJ](https://www.wsj.com)

- From Census Analysis of Net Wealth of Households under age of 35:
  - Median net worth for Millennials in 2011: $6,676
  - Median debt for Millennials in 2011: $45,300

- The unemployment rate for young people scraped 18 percent in 2010, and in the past five years, real wages have fallen for Millennials—and only for Millennials. [The Atlantic](https://www.theatlantic.com)

Compared to Gen X, Millennials are more educated but make less money and are less likely to work

• 21 percent of Millennial males have completed a bachelor’s or above, compared to 18 percent for Gen X males; 27 percent of Millennial females compared to 20 percent Gen X females have completed a bachelor’s or above.

• When they were between the ages of 18-33, Gen X household income was $63,365. For Millennials, household income has declined to $61,003.

• For Gen X males, 78 percent were employed at the ages of 18-33, whereas only 68 percent of Millennial males are employed. For females, 69 percent of Gen X were employed compared to 63 percent of Millennials.

Source: Pew
Millennials also have the highest levels of student debt

• Between 2004 and 2014, there was an 89 percent increase in the number of student borrowers, as well as a 77 percent increase in the average balance held by student borrowers. New York Fed

• While more students borrow to cover the cost of education, the average size of outstanding student loans is also increasing. Between 2007 and 2014, the average outstanding loan per student grew from $18,233 to $27,689. National Women’s Business Council

• While only 30 percent of students took out loans to finance their education in the mid-1990s, half of all students borrowed during the 2013-2014 school year. White House
Wages are stagnant compared with earlier generations, but there is a wage premium for college grads

• The wage gap between adults with just a high-school education vs. adults with a post-secondary education is increasing, making a college degree a lot more valuable than in previous generations.

• High school graduates in 1979 could expect to earn 77 percent of a college graduate’s salary, while in 2014, earners with a high school diploma can only expect to make 62 percent of a college grad’s salary.

• The median annual salary for Millennials ages 25-32 with a bachelor’s degree was $45,500 in 2012, nearly double the $28,000 median annual salary for high school graduates.

• Millennials are more educated than previous generations, but their earnings have not improved – median annual earnings for Millennials in 2014 was $35,000, equal to Baby Boomers.

Source: Pew Research Center
If a Millennial won $5,000 tax-free, a plurality would use that money to pay off bills and loans

If you found out you won the lottery today and got $5,000 tax-free, what would you be MOST likely to do with it?

- Pay off bills and loans: 44%
- Put it in a savings account: 31%
- Invest in stocks, bonds or mutual funds: 11%
- Spend it on experiences, like travel: 6%
- Spend it on things, like a car: 5%
A significant majority of Millennials are worried about their ability to repay student loans

Are you worried about not being able to afford to pay back your student loans?

Millennials are:
Conflicted about college, believing that it should be a national priority, but wondering if it will pay off for them
Student debt is a fact of life for most Millennials

What was the last grade you completed in school?

- High School or Less: 22%
- Some College: 41%
- College+: 36%

Do you have student loan debt that you are either currently paying off, or do you expect to take on student debt loan in the future?

- Yes, Paying Off: 32%
- Yes, Take on Debt: 21%
- No: 53%
- Total: 45%
Nearly half of Millennials question the cost-benefit of their higher education

Do you believe that student loan debt has limited your career options?*

Yes: 43%  No: 48%

Do you think the benefits of your college education will be worth the financial costs?^

Yes: 49%  No: 32%

*Asked of Sample A only.  ^Asked of Sample B only.
Yet, Millennials have a lot of confidence in colleges and universities, second only to the military.

How much confidence do you have in each of these American institutions – a great deal, quite a lot, some, or very little?

African-Americans are most likely to have considered starting their own business.
Access to capital is the biggest barrier for would-be Millennial entrepreneurs, especially minorities

Which of the following would you say is the biggest obstacle that would keep you from starting your own business? I don’t have the financial means to start a business, I have no desire to start a business, I am afraid that if I started a new business, it would fail, or I don’t know how to start a business.
Women and minorities receive far less funding than male entrepreneurs in the United States

• Woman-owned companies receive only one out of every 23 dollars of small business lending even though they own three out of every 10 employer firms.

• Men start businesses with approximately twice as much capital as either women or minority entrepreneurs.

• For every nine men that raise equity financing to start and scale a business, only one woman does; male entrepreneurs typically receive 18 percent of their capital from equity, while women receive two percent.

• Minority-owned businesses are three times more likely to be turned down for a loan than white-owned businesses, and those that are granted loans receive less credit at less favorable rates.

Sources: Survey of Current Business Owners; The Hamilton Project, “Minority and Women Entrepreneurs” (Brookings, 2015); National Women’s Business Council
There is an overwhelming sense that government makes things difficult for new businesses to succeed.

Do you believe that the government makes it easy or difficult for people to succeed in starting their own business?
