Agenda

• Overview of the White House Council of Economic Advisers’ report
• Opportunity Zones market snapshot
• Investments that are creating an impact
• Q & A
• Opportunity Zones resources
On August 24, the Council of Economic Advisers released new findings on the impact of OZs on designated communities. The report included:

- Statistics about OZs
- Investments and local initiatives
- Models of projected economic and budgetary impacts

Key findings:
- Opportunity Funds raised an estimate of $75 billion in private capital by the end of 2019.
  - $27.3 billion is new induced investment.
  - $24.9 billion is new to OZs but was shifted from elsewhere in the country.
  - $22.8 billion would have occurred anyway in OZs.
- New capital represents 21 percent of total annual investment in OZs.
- Private equity investment in OZ businesses grew 29 percent relative to peers.
- Capital raised could lift one million people out of poverty, decreasing poverty in OZs by 11 percent.

Increases in property values holds the possibility of creating wealth in communities, as well as shoring up municipal tax bases from infill development.

- Home values = + 1.1 percent
- Redevelopment properties = + 14 percent
- Vacant properties = + 20 percent
Economic Innovation Group’s response

This exercise underscores the need for reporting requirements. Relatedly, it is still too early in the incentive’s life to fully and accurately assess its impact on designated communities.

In addition to reporting requirements, EIG called on Congress to improve the OZ incentive by:

• Eliminating specific high-income census tracts that do not meet the spirit of the incentive and replacing them with tracts more deserving of the designation.

• Providing support to communities for capacity building and technical assistance.

• Extending the 2026 tax deadline by two years to allow for more stakeholders to engage in the market and receive the benefits.

Improvements to Opportunity Zones policy are needed ... beginning with stronger reporting requirements and transparency so that policymakers, as well as investors, gain a more accurate understanding of the impact of the incentive in communities.

Market snapshot: Bipartisan support

Former Vice President Joe Biden recognizes that OZs can play a role in advancing racial equality across the U.S. economy. The Biden campaign recently called for changes to strengthen the policy.

A host of governors have also expressed their support for OZs:
“We are honored to be recognized as a national leader in Opportunity Zones. With 126 designated zones that span the state, Colorado’s Opportunity Zones are attracting capital to our state, helping to grow our economy and supporting our rural communities.”
- CO Governor Jared Polis

"We plan to do everything in our power to utilize new and existing state and federal programs, grants and funding sources, and to have all of our state agencies work collaboratively with our county and municipal governments and the private sector to supercharge our opportunity zone revitalization.”
- MD Governor Larry Hogan

Commentary: How we can use Opportunity Zones to re-imagine North Charleston
“So, is there a way to reap the nutrients of making a neighborhood middle-class without the poisons? That is to say, can we “gentrify” a place without evicting the people living there? That is the idea behind Opportunity Zones.”
- SC State Representative Marvin Pendarvis
Market snapshot: Impact themes

Opportunity Zones is yielding investment in a wide range of activities in communities of every size across the country. Activity is coalescing around the following themes of impact.

• Creating affordable and workforce housing
• Supporting small businesses and entrepreneurship
• Seeding neighborhood revitalization
• Driving innovation
• Improving health outcomes
• Revitalizing rural communities
• Partnering with anchor institutions and local government
Creating affordable and workforce housing

Miami, FL:
Two affordable housing projects will create 635 homes. One of the projects is the biggest affordable housing project incorporating Opportunity Zone capital to date, according to the Miami Herald. “Teachers and police officers and firefighters would have never been able to afford living here. Now we have income restrictions and they’re voluntarily imposed by the developer because the financing worked,” said Mayor Francis Suarez.

Miami is getting two new affordable housing projects, both inside Opportunity Zones

Lexington, KY:
A family-run Opportunity Fund is revitalizing dilapidated single-family homes in Lexington, working alongside the city and local banks to create a pathway towards homeownership. Nest Opportunity Fund places a portion of rent aside, allowing renters to build equity and eventually purchase their home.

Supporting small businesses and entrepreneurship

Wilmington, DE:
Second Chances Farm (SCF), Delaware's first vertical, hydroponic farm, is expanding and attracting more OZ investment. SCF seeks to “solve several different societal issues at once, including recidivism, climate change, unemployment, and food insecurity.” SCF has hired two dozen individuals to date. SCF is also contracting with a local grocer during the pandemic to continue to provide fresh, local produce.

Second Chances Farm secures $1.5M investment, eyes growth

Mesa, AZ:
Co-working company Launch Pad is slated to open its first Arizona location in a property owned by Opportunity Fund manager Caliber. Launch Pad received an Opportunity Zones investment from Caliber, which is the lead investor in the company's Series A funding round.

New Orleans-based coworking company to open in Mesa 'opportunity zone’
Coatesville, PA:
The City of Coatesville has announced the Coatesville Impact Fund, developed by Activated Capital of New York. “We anticipate deploying $25 million through the fund in Coatesville and its surrounding areas centered on single-family and multi-family residential and small commercial properties,” said Joshua Burrell, Managing Partner, Activated Capital. “Activated also looks to invest in local businesses that are aligned with the values inherent to the Impact Fund.”

Driving innovation

Braddock, PA:
A solar-powered, fully-automated, vertical farming operation is expanding access to fresh food in a food desert and creating a bridge to jobs for a community that experienced an 80 percent population loss due to the contraction of the steel industry. Fifth Season employs about 30 people full time, 30 part-time, and they are currently hiring. “We have people who have in some cases less than high school level certifications, working alongside some of the most advanced robotics in the world,” says Grant Vandenbussche.

Improving health outcomes

Philadelphia, PA:
TPP Capital Management Group, a Black-led social impact private equity group, aims to raise $1 billion to invest in improving health outcomes in Black neighborhoods. TPP’s first $300 million will be directly invested in Tioga, a Philadelphia Opportunity Zone where 85.5 percent of its residents are African American, 33.3 percent are seniors, 43 percent live in poverty, and 18 percent of the population was unemployed pre-COVID.

Philadelphia Based Black-led Private Equity Fund Seeks One Billion for Black Health

Springfield, VT:
The Center for Rural Innovation (CORI) made an Opportunity Zone investment in Voi, Inc., a leader in the use of AI-driven digital technology to provide behavioral healthcare solutions with a focus on detection of and care for those at risk of suicide. Aidan Calvelli of CORI said “The company is eager to offer its technology and solutions to help improve mental health outcomes in the U.S. military and beyond.”

Revitalizing rural communities

Warren, OH:
Two of BRITE Energy Innovators’ portfolio companies are among the first startups in the nation to attract Opportunity Zones investment. Warren-based Intwine Connect - a Internet of Things (IoT) hardware and software solutions provider, and Akron’s GeneratorWorks - a developer of healthcare support applications, will use the equity to support wider deployment of their advanced technology solutions.

Opportunity Zone Funding Powers NE Ohio Innovation

Ralston, NE:
The Old Ralston Granary will be the focus of a $14 million partnership to bring new housing, businesses and jobs to Ralston. I See It Ventures will invest $2 million into a new business accelerator that will provide up-and-coming companies with capital investment, guidance and support. Gordon Whittman, owner of I See It Ventures, noted that he chose Ralston due to its OZ designation, and the incentive will allow him to increase the amount he is investing by 27 percent.

Ralston looking to create more businesses and jobs

EIG
August 2020
Pembroke, NC:
A new student housing project at the University of North Carolina in Pembroke will expand the supply of housing options available for students, and support the university’s goal of increasing enrollment. Expanding enrollment to 10,000 students will qualify UNC-Pembroke for research grants and Federal funding, allowing the school to enhance the quality of education it can offer to students. UNC-Pembroke serves a majority-minority student population; 13 percent of students are American Indian, 31 percent of students are Black or African American, and 7 percent are Hispanic or Latino.

Flexibility provided through Opportunity Zones financing was critical to bringing the 192-bed project to fruition. “Many student housing lenders/investors will not provide financing to student housing projects on campuses with less than 10,000 students,” said Mike Thomas, a Managing Member for LU1Pembroke.
